### SUMMARY

A frontend developer is responsible for creating the user interface and implementing the client-side logic of a website or web application. This includes writing HTML, CSS, and JavaScript code to build interactive and responsive web pages. Frontend developers work closely with designers and backend developers to ensure a seamless user experience. They also need to stay updated on the latest technologies and trends in web development to create modern and efficient user interfaces. Overall, frontend developers play a crucial role in shaping the visual and interactive aspects of a website or web application.
